

## **Therion Products - Safe & Effectiveness**

Therion takes your health and wellness seriously. Our products have been engineered and developed based on over 14 years of extensive research by a team of experts, including one of the few U.S. Registered Magnetic Therapists. They reduce pain, inflammation and promote healing better and faster than any similar solution on the market - while helping you avoid the side effects commonly associated with drugs.

Steven Schenkman, past President of the New York college of Health Professions stated that, "Therion's professional magnetic therapy product solutions are unlike anything I have used before. They incorporate very high-energy research grade biomagnets and patented therapeutic technologies that are so effective, they are far beyond anything available today."

Traditional and alternative therapies have made great strides in many areas, but the reality is that most therapies are lacking when it comes to treating chronic pain, inflammation and sleep disorders.

Our mission is to promote optimum wellness and improved quality of life through the use of Therion's Advanced Biomagnetics® product line.

### **Why Is Therion More Effective Than All Other Brands?**

In magnetic therapy, the stronger the magnetic field, the more effective and faster acting a magnet therapy product will be. As a direct manufacturer, Therion purchases large quantities of raw materials. Because of our volume, we have access to high-energy, research grade magnetic materials that are not available to the commercial market. Using these research grade materials, Therion magnets are made to our exact specifications to ensure their effectiveness. Our magnets are stronger, larger and more effective than any other brand.

There is a lot more to Therion products than the magnets themselves. Over the years we have developed patented engineering methods and materials that are unmatched in therapeutic performance. Combined with Therion magnets they significantly increase the effectiveness and quality of our products.

Therion products are **up to 70x more effective** than other magnetic therapy brands. This is not a marketing claim; it is a fact.

### **Proven Safe, Effective Relief**

A 12-month, double-blind, clinical study was conducted in Japan by Sanikukal Hospital, Tokyo Communications Hospital and Kouseikai Suzuki Hospital. The purpose of the study was to determine the effectiveness of magnetic mattress pads for pain relief.

The results of the study showed that more than 80 percent of patients reported that they noticed a significant reduction in pain and inflammation. More than half of the patients reported positive results within three days or less. This is just one of over 300 clinical studies proving the effectiveness and safety of magnetic therapy.

Therion has been extremely successful in providing natural pain relief and accelerated healing, and we are very proud of this accomplishment. Therion products are prescribed by doctors and therapists and have been proven to be safe and effective by thousands of people worldwide.
